SUMMARY

Results-driven **PHP / Laravel Developer** with **3 years of professional experience** building secure, scalable, and high-performance web applications. Expert in **backend architecture, RESTful API development, and MySQL optimization**, with hands-on experience delivering business-critical systems such as ERPs, CRMs, and e-commerce platforms. Known for writing clean, maintainable code and collaborating closely with cross-functional teams to translate complex requirements into reliable, production-ready solutions.

PROFESSIONAL EXPERIENCE

PHP Developer	Quantum IT Innovation	Aug 2025 – Present
----------------------	-----------------------	--------------------

- Leading backend development for business-critical web applications using Laravel and MySQL.
- Designing RESTful APIs and integrating third-party services to support scalable product features.
- Collaborating closely with frontend teams (React / Inertia) to deliver seamless end-to-end functionality.
- Improving performance, security, and code quality through refactoring and best practices.

PHP Developer	CodeZones IT Services	Jan 2023 – Jul 2025
----------------------	-----------------------	---------------------

- Developed and maintained scalable backend systems using Laravel, improving overall application performance and reliability.
- Designed and optimized MySQL schemas, indexes, and queries, achieving up to **2× faster report and data processing**.
- Built secure RESTful APIs and integrated third-party services including **Stripe, Razorpay, and PayPal**.
- Improved application security and stability by implementing OWASP best practices and structured error handling.

RECENT PROJECTS

MeinHaus – Canadian Home Services Platform	2025
---	------

- Contributed backend features for a digital home services marketplace connecting homeowners with licensed contractors and builders across Canada.
- Built and optimized REST APIs for project requests, contractor matching, and estimate flows, improving reliability and response time.
- Integrated geolocation capabilities to support location-based service discovery and scheduling.
- Assisted with payment workflows and user notification systems to streamline customer experience.
- **Stack:** Laravel, MySQL, JavaScript, Livewire

Borucular – Daily Reporting & Financial Management System	2025
--	------

- Developed a web application to track daily work reports for customers and welders, enabling structured submission and review of operational data.
- Built a complex admin panel to manage, verify, and approve daily reports with role-based access and audit-friendly workflows.
- Implemented financial modules for tracking payments, expenses, and report-based calculations to support accurate billing and reconciliation.

- Designed secure validation logic and optimized database workflows to ensure data integrity and long-term maintainability.
- **Stack:** Laravel, PHP, MySQL, HTML/CSS.

MashBricks – Interior Estimation & Admin Platform

2025

- Developed full-stack features for an interior design and home services platform using Laravel with Inertia.js.
- Built interactive estimation tools, including an **Interior Estimate Calculator** and a **Painting Cost Estimator**, using React for a smooth, SPA-like user experience.
- Implemented complex pricing logic, dynamic form handling, and real-time calculations to generate accurate project estimates.
- Designed and maintained admin dashboards for managing estimates, content, and business workflows with a focus on performance and usability.
- **Stack:** Laravel, Inertia, React, TypeScript, PHP, MySQL.

EDUCATION

Bachelor of Computer Application, Integral University
CGPA: 9.07

Jul 2022

Intermediate, N.J.E School

2018

SKILLS

- **Languages:** PHP, JavaScript, Python, HTML/CSS
- **Frameworks:** Laravel
- **Front-end:** React, jQuery, Ajax, Livewire, Inertia
- **Databases:** MySQL, PostgreSQL
- **Generative AI:** OpenAI API, Gemini API, ChatGPT function-calling, prompt engineering
- **Version Control & Collaboration:** Git, GitHub, Bitbucket, GitLab, Jira
- **Infrastructure & Hosting:** VPS, Nginx, cPanel
- **Tools:** Postman, phpMyAdmin
- **Operating Systems:** CentOS, Kali Linux, Ubuntu, Windows
